## Declaration of Interest

Why I want to be a part of the NUS Students' Computing Club Management Committee:

As much as academics is important, I believe that the health and welfare of my fellow computing mates should be well taken care of. Especially because of the nature of the courses in SOC (require long hours of sitting in front of their computers just to get the code right), health is an aspect that is often neglected. I've heard seniors talk about how they get their inspirations to code after taking a break from it and I personally feel that sports has the ability to clear our minds, hence making us more productive. I hope to provide my fellow SOC students with an avenue to clear their heads, making coding easier. I hope short mark exercising session will benefit my fellow faculty mates.

I personally feel that sports has the ability to bring people together as it allows people to feel a sense of attachment and identity. Hence, I hope to gather people together to play and support IFG.

Sports have always ~~been~~<sup>had</sup> a special place in my heart. Sweating after playing sports makes me feel alive, happy & refreshed. I hope to share my passion for sports with my faculty mates.

I would also like to take this opportunity to expose myself to large scale events like IFG and hopefully, camps. Although I've held EXCO positions in my previous institutions, I've never gotten much freedom and liberty to plan and execute events.

<sup>would</sup>  
Hence, I like to be given this opportunity to be part of the management committee to serve my people.
